Frontend: HTML5, CSS3, JavaScript, JQuery, ReactJS, Angular, Redux, Handlebars, AJAX, Bootstrap, SASS
Backend: Java, OOP, NodeJS, Node Package Manager (NPM), JSON, ExpressJS, Sequelize, NoSQL, MongoDB, Mongoose, Express-Handlebars, PHP, MySQL, REST API
Design: Adobe Illustrator, Photoshop, Dreamweaver

RELEVANT EXPERIENCE

Happenings App

GitHub Repo: <https://github.com/nicholas-romano/Happenings>

Deployed Page: <https://the-happenings-app.herokuapp.com/>

Role: Created ExpressJS routes and MongooseJS data models to post and retrieve data from the Mongo database.

- Displays an interactive map connected to a review form that uses the user's Geolocation coordinates to find businesses nearby that match the name of the place typed in the search field and then places them in a clickable pin icon on the map.
- Developed the review post form, friends feed, comments section, comment post form, friends page, and settings page
- HTML5, CSS3, Bulma, JavaScript, NodeJS, ExpressJS, MongooseJS, MongoDB, MapBox API

Recipe Book

GitHub Repo: <https://github.com/nicholas-romano/Recipes-Book>

Deployed Page: <https://create-recipe-book.herokuapp.com/>

Role: Lead Developer of a group of four. Designed and developed main dashboard page, recipe search results, recipe details, and recipe step pages. Used ExpressJS with Sequelize and MySQL to store and retrieve recipes from a database.

- Searches recipe information including diet, ingredients, nutrition, and steps based on keywords and dietary restrictions. Gives the users the ability to save recipes and view them again later

Continued...

- Developed JQuery code to use AJAX requests pulling data from the Spoonacular API website
- Connected all the HTML routes on the UI and the API routes to display the data needed for each page
- HTML5, CSS3, Bootstrap, JavaScript, JQuery, AJAX, NodeJS, ExpressJS, Sequelize, MySQL

Places and News Search

GitHub Repo: github.com/nicholas-romano/Places-and-News-Search

Deployed: nicholas-romano.github.io/Places-and-News-Search

Role: Lead Developer in group of three. Connected Backend Google Places API with queries from a search form.

- Searched information, photos, and news articles by keyword, type, and/or search radius
- Developed the JQuery code to use AJAX requests connecting to the Google Places API to display search results that include images, business names, addresses, category, open status, and cost index
- HTML5, CSS3, Materialize, JavaScript, JQuery, AJAX, Google Places API, News API

WORK EXPERIENCE

Cisco Systems Inc.

January 2018 – October 2019

Web Developer/Designer Contractor

Morrisville, N.C.

- Utilized web technologies such as HTML5, CSS3, JavaScript, and JQuery for website structure, design, and interactivity. Constructed workflow diagrams and designed web graphics
- Effectively created and updated customer service agent instruction web pages using Adobe Experience Manager CQ5 software, making the overall user interface and user experience more efficient.
- Successfully developed a global search feature, targeting specific pages based on keywords and simplified main menu pages by consolidating and reorganizing the layout of category sections allowing for more efficient information resource searching

Raleigh Jaycees

December 2016 – December 2018

Web Developer Volunteer

Raleigh, N.C.

- Updated and created new content and functionality on the Jaycee owned sites and created a new design for an online administrator portal that queries member data
- Successfully designed and developed a responsive, mobile compatible Chapel Hill Holiday Parade site for the 2017 and 2018 winter seasons using HTML5, CSS3, SASS, Bootstrap, JavaScript, and JQuery
- The parade site has an appealing winter theme that is organized and easy to navigate, displaying information in tiles and panels with overlay photo galleries and a photo slider with pictures from previous years.

Pragmatics Inc.

July 2015 – March 2016

Application Programmer / Analyst, Associate

Arlington, V.A.

- Received an award for successful completion of an easy-to-use, responsive, mobile-compatible user interface for the Federal Deposit Insurance Corporation's (FDIC) Bank Data Systems Institution Directory search application using HTML5, CSS3, SASS, Bootstrap, JavaScript, and JQuery to display information on banks located throughout the U.S. (Obtained a Public Trust Security Clearance).
- Enhanced the responsive user interface of the FDIC's Receivership Oversight Management System (ROMS) application using BackboneJS and JQuery
- Tested SQL queries in Oracle MS SQL database to correctly map and chart data on Receivership reports.

Association of American Medical Colleges (AAMC)

January 2015 – June 2015

UI/UX Designer Contractor

N.W. Washington, D.C.

- Created a responsive, mobile-compatible, simplified user interface design for a financial disclosure application for institutions and organizations nationwide using HTML5, CSS3, Bootstrap, JavaScript, and JQuery
- Devised the design for a student portal for medical school students.
