Portfolio: <https://nicholas-romano-portfolio.netlify.app/>

Full Stack Web Developer and UX Designer educated at the University of North Carolina and James Madison University. Skilled in responsive web technologies such as HTML5, CSS3, JavaScript, JQuery and Bootstrap, and architectures such as ReactJS, ExpressJS, NodeJS, and back-end data modeling technologies such as Sequelize and Mongoose in connection to back-end databases such as MongoDB and MySQL. My strengths include a passion for creativity, dedication to problem-solving, and commitment to quality work. I'm excited about the next opportunity to leverage my skills and experience to assist a company or organization succeed.

TECHNICAL SKILLS

WORK EXPERIENCE

Self Employed

November 2023 - July 2025

Marketing Strategist and Designer

Raleigh, N.C.

- Owned and operated an online eCommerce business
- Utilized Shopify store implementation to manage products and orders, and optimize selling strategies
- Set up Search Engine Optimization (SEO) for product titles, descriptions, and keywords
- Promoted products on Facebook, Instagram, Pinterest, and TikTok, Amazon, and Ebay

Extron Electronics

February 2022 – July 2023

Front-End Web Developer

Raleigh, N.C.

- Updated, contributed to, and maintained the Extron Sync Library – An Angular Storybook web directory application of components and features used by developers on product sites
- Developed and maintained component features such as cards, dropdown menus, tabs, sliders, interactive forms, and buttons using Angular, Typescript, and HTML5
- Tested components inside Angular spec files using Karma
- Programmed and committed codebase using Git commands inside Visual Studio

Martin Marietta Materials

July 2021 – January 2022

Software Engineer Contractor

Raleigh, NC

- Created a newly designed magnesia product website in 3 months time improving client usability with an intuitive layout, well-organized navigation bar, and high-definition images.
- Dynamically displayed data using ReactJS and jQuery to make AJAX REST requests to JSON files to display data on certain pages.
- Utilized Bootstrap CSS style library to design a responsive layout and sized images using Adobe Photoshop, and created wireframes and prototypes with Figma.

Bluevenn

October 2020 – July 2021

Database Developer

Raleigh, NC

- Built data and DB subsystems using data visualization techniques to scale to maximum performance.
- Utilized report tools for tracking and resolving database related incidents and requests.
- Managed operational needs of the database (DB) subsystems (e.g. DB backups, maintenance, monitoring), tuning and performance optimization.
- Monitored incoming daily/weekly client files, DB refreshes, and hosted servers.
- Worked inside MSSQL, writing SQL queries to create table Joins and Views to display data in more efficient ways

Cisco Systems Inc.

January 2018 – October 2019

Web Developer/Designer Contractor

Morrisville, NC

- Utilized web technologies such as HTML5, CSS3, JavaScript, and JQuery for website structure, design, and interactivity. Constructed workflow diagrams and designed web graphics
- Effectively created and updated customer service agent instruction web pages using Adobe Experience Manager CQ5 software, making the overall user interface and user experience more efficient.
- Successfully developed a global search feature, targeting specific pages based on keywords and simplified main menu pages by consolidating and reorganizing the layout of category sections allowing for more efficient information resource searching

Raleigh Jaycees

December 2016 – December 2018

Web Developer Volunteer

Raleigh, NC

- Updated and created new content and functionality on the Jaycee owned WordPress sites and created a new design for an online administrator portal that queries member data
- Successfully designed and developed a responsive, mobile compatible Chapel Hill Holiday Parade site for the 2017 and 2018 winter seasons using HTML5, CSS3, SASS, Bootstrap, JavaScript, and JQuery
- The parade site has an appealing winter theme that is organized and easy to navigate, displaying information in tiles and panels with overlay photo galleries and a photo slider with pictures from previous years.

Pragmatics Inc.

July 2015 – March 2016

Applications Programmer / Analyst, Associate

Arlington, VA

- Obtained a Public Trust Security Clearance.
- Developed responsive, mobile-compatible user interface for the Federal Deposit Insurance Corporation's (FDIC) Bank Data Systems Institution Directory search application using HTML5, CSS3, SASS, Bootstrap, JQuery, and JavaScript to display information on banks located throughout the U.S.
- Enhanced the responsive user interface of the FDIC's Receivership Oversight Management System (ROMS) application using BackboneJS and JQuery
- Tested SQL queries in Oracle MS SQL database to correctly map and chart data on Receivership reports.
- Programmed and committed codebase using Git commands inside Visual Studio

Association of American Medical Colleges (AAMC)

January 2015 – June 2015

UI/UX Designer Contractor

N.W. Washington, D.C.

- Created a responsive mobile-compatible user interface design for a financial disclosure application for institutions and organizations nationwide using HTML5, CSS3, Bootstrap, JavaScript, and jQuery
